**MINERAL BASED BRAND OF COSMETICS**

SST formulations use the highest quality minerals from around the world. These minerals are finely milled before ingredients are added to the minerals that have positive benefit for the skin. These ingredients are what take the minerals from loose powder form to a pressed, liquid, gel or cream form.

**PARABEN FREE**

Parabens are used as preservatives in many cosmetic and personal care products, including make-up. Parabens have been found to weakly mimic estrogens in animal studies due to the fact that parabens easily penetrate the skin. This raises health concerns because of the link between the hormone estrogen and breast cancer. There are many questions and conflicting scientific studies about the effects of low level estrogen in humans, and is continually being monitored. At SST we have made a choice to use paraben free formulations. High levels of anti-oxidants help to preserve our product in the same manner that parabens would. You can rest easy knowing you are using safe cosmetics!
